vVISION

The revolution
in inspection system operation —
easy, convenient, fast

VISCOM
vision technology

vVISION
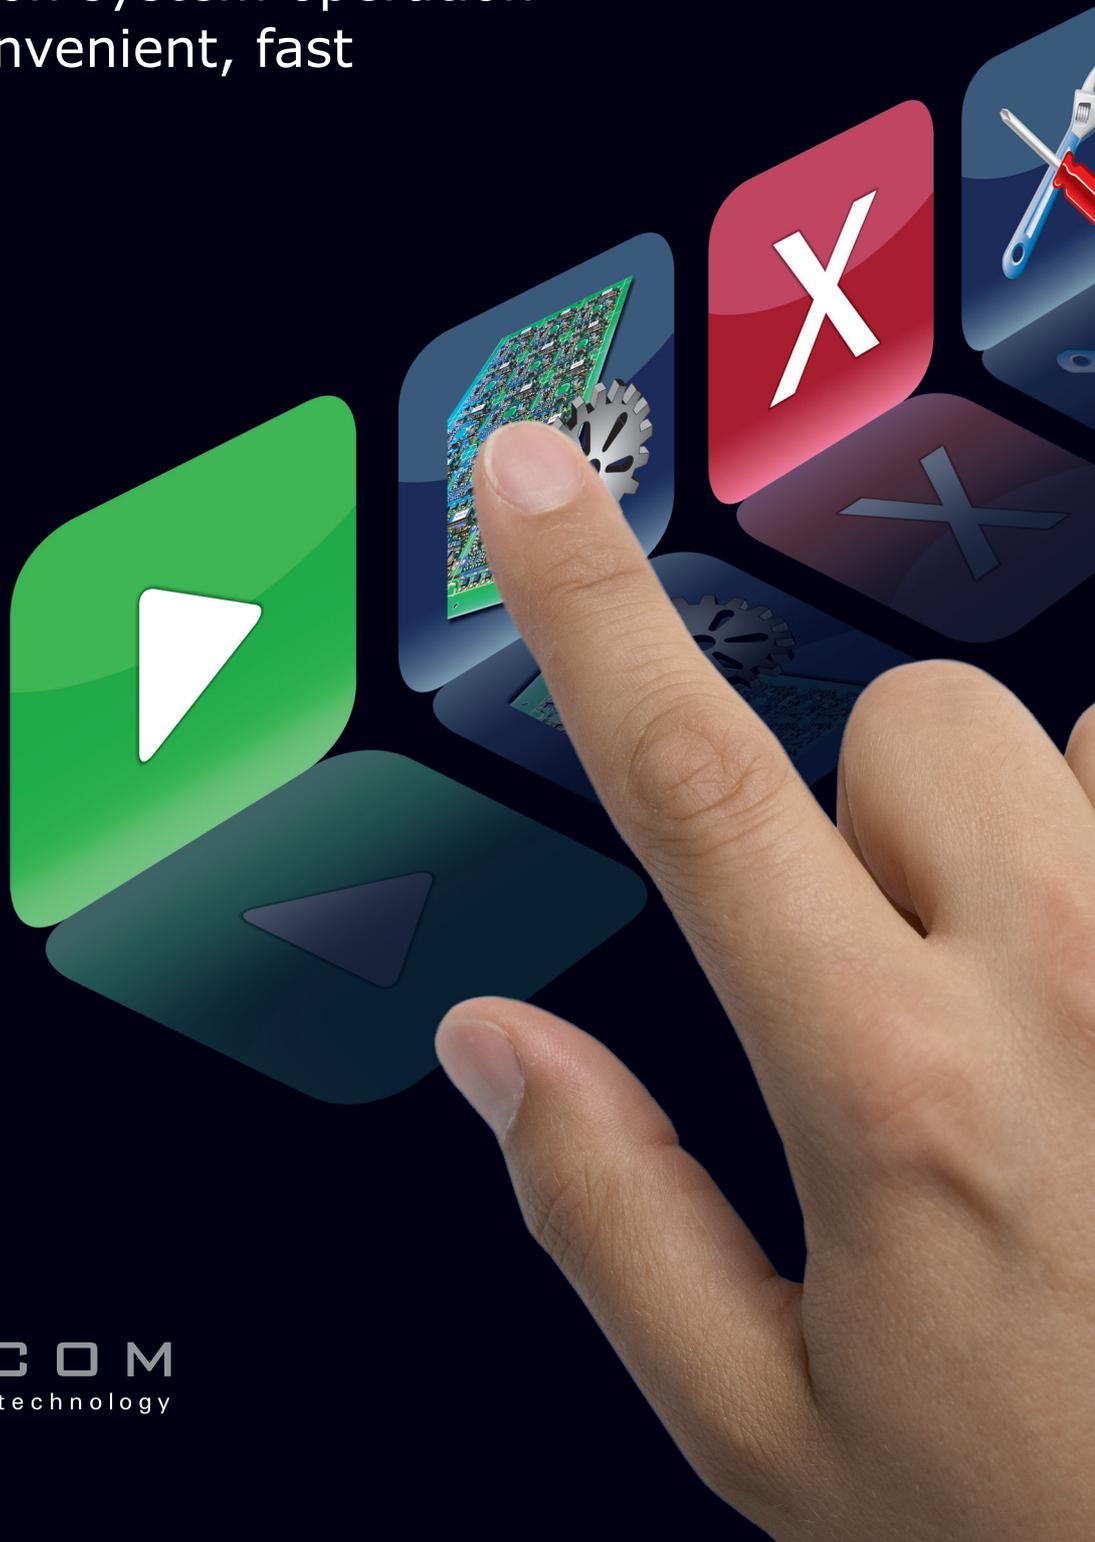

Inspection operation made easy ...

Automatic operation

This mode is utilized to fully inspect all features of your board. All basic data and the statistic are clearly displayed.

CAD transfer

This feature supports new program creation. Input data from various formats can easily be imported. The components are then automatically assigned to existing algorithms within the vVision library.

Optimization

Only a few simple steps are needed to optimize the program, on the basis of automatically collected verification images. This way, inspection program quality can be verified and archived very quickly and easily.

... vVision – intelligent software for
IPC-compliant inspection

vVISION

Inspection highlights

- For the beginner:
  Fast, simple program creation

- For the experienced operator:
  The "Expert Mode" offers
  advanced program capability

- Effective component-oriented method

- Comprehensive IPC-compliant
  Viscom inspection library

- Integrated Verification for easy
  monitoring and optimization
  of the inspection program

The verification station vVerify

- Clear, descriptive display
  of inspection results

- Additional color images of
  angular views for
  operator support

- High-resolution color
  overview image

- Customer-specific
  screen view

- 100 % traceability of
  inspection results
