Change of Staff in Viscom Sales: Thomas Winkel Takes Over From Reinhard Pollak

Hanover, March 24, 2020 – In the year 2000, a long and fruitful business relationship began: Viscom AG and Repotech GmbH commenced joint sales activities in southern Germany, Switzerland and parts of Austria. After 20 years of this successful working partnership, Repotech founder Reinhard Pollak is now taking his well-earned retirement and handing over the reins to Thomas Winkel.

Reinhard Pollak founded Repotech GmbH at Lake Constance in 1994, offering production facilities for preparing and testing electronic assemblies. Over the years, more than a hundred companies have used Repotech's services, and still use machines or production lines that were selected and configured with the benefit of the company's expertise. Repotech GmbH kept to a small and select group of specialists in electronics production equipment, who represented the company in its sales region. This ensured that customers received top quality advice at all times. Reinhard Pollak's customers ranged from small and medium-sized enterprises to multinational corporations. In 2016, Repotech focused exclusively on its partnership with Viscom to guarantee sufficient technical consulting for customer-specific configurable inspection solutions.

"We are looking back on a 20-year-old business relationship. When a business relationship lasts this long, it is based on core values such as trust, openness, reliability and loyalty. We have found all these qualities in this partnership and have gone through many successful years together, along with some more difficult ones. This in itself is extraordinary and our mutual customers have also noticed this. Reinhard Pollak's honest and customer-focused approach, combined with the high level of technical expertise and many years of experience, has always been highly valued by our customers," says Torsten Pelzer, general sales manager of Viscom AG, as he looks back.

After Reinhard Pollak retires from active sales, Thomas Winkel will take over the sales activities and customer service. Viscom is very pleased to have found an equally effective and reliable successor in Thomas Winkel, and to be able to continue this customer service tradition at the same superior level. Thomas Winkel looks back on more than 20 years of professional experience in image processing, having advised customers

from the automotive supply industry worldwide. “My goal is to provide our customers and other stakeholders with the same level of intensive and solution-focused advice and support as they have become used to from Reinhard Pollak,” says Winkel. Viscom AG wishes Reinhard Pollak all the best for his well-deserved retirement and would like to thank him for his many years of success and loyalty. Viscom also welcomes Thomas Winkel and wishes him well in his new duties.

About Viscom

Founded in 1984, Viscom AG is one of the leading suppliers worldwide in the field of assembly inspection within electronics production. With its headquarters and production site based in Hanover, Germany, the company develops, produces and sells high-quality inspection systems from the areas of AOI, SPI, AXI, MXI, wire bond inspection as well as CCI for conformal coating inspection. The systems from Hanover set high standards in terms of accuracy and speed. The product range covers the complete spectrum of optical inspection and X-ray inspection for small- and medium-sized companies as well as for large series production. Viscom systems are used for 100% automatic inspection of electronic assemblies, such as in the production of automotive electronics, aerospace technology and in the manufacture of telecommunications electronics.

Product development also focuses on customer-specific system developments and networking with other production processes for smart factory applications. In order to achieve this, Viscom AG increasingly invests in its own software and hardware development, which is constantly defining new standards in inspection technology.

International sales are handled by a broad network of its own subsidiaries, application centers, service centers and representatives. A service team of in-house technicians and application specialists commission Viscom systems worldwide, offering maintenance, conversion and modernization from a single source. In addition, system-specific training courses are offered for customers' operators, programmers and maintenance personnel. Experienced engineers and technicians from the application and service departments share their expert knowledge with participants.

Viscom AG has been listed on the Frankfurt Stock Exchange since 2006 (ISIN: DE0007846867).
