Price change in the area of transportation from 1/1/2021

Dear Viscom customer,

The costs in the area of transportation are increasing exorbitantly. We are therefore compelled **to increase the price per kilometer driven to 0.65ct/km**. This means that we are still in the lower price range of our competitors in the market.

This increase applies only to customers who do not have current contracts or where there are valid offers or price commitments.

We appreciate your understanding.

Best regards,

Torsten Pelzer
Vice President Sales
Viscom AG
