

Viscom develops, manufactures and sells high-quality inspection systems. Our portfolio encompasses the complete bandwidth of optical and X-ray inspections. In the area of assembly inspection for electronics manufacturing, Viscom is among the leading suppliers worldwide.

For our location in Duluth, GA, we look for you as:

Applications Engineer – Full Time

Duties

- Meet with prospective customers, determine their requirements, demonstrate system capabilities, and deliver technical presentations
- Optimize performance of existing systems/installations at existing customer's manufacturing lines
- Prepare inspection programs for AOI, AXI and SPI systems
- Perform feasibility studies with customer samples in our Applications Labs
- Demonstrate systems to customers and provide training
- Enhancing experience with the Advance SMT process and its equipment
- Report status to the Engineering Manager on a weekly basis.

Requirements

- Bachelor's in Mechanical Engineering or Equivalent
- Plus 5 year experience in job offered or related
- Any suitable combination of education, training or experience accepted
- Travel involved to unanticipated client locations
