

Press Release

SMD-TEC is new Viscom representative in Benelux

Hanover, September 2015 – Viscom and SMD-TEC are now working closely together in Benelux. Effective immediately, Viscom AG, one of the leading manufacturers of inspection systems in the electronics industry, is being promoted in Benelux by the new representative SMD-TEC. General manager Tom Van Tongelen has rebuilt SMD-TEC from the former Benelux subsidiary of Essemtec into an independent sales and service company, thus facilitating the sales partnership with Viscom.

With over twenty years of experience in electronics manufacturing, SMD-TEC is a competent partner wherever investment in new equipment and process expertise in SMT production is concerned. With his closely partnered business relationships to customers in Belgium, the Netherlands and Luxemburg, Tom Van Tongelen and his team ensure not only first-class consultation, but are also handling on-site technical support.

Olesja Münch, who is responsible for Benelux customers at Viscom, is pleased with the collaboration: "With Tom Van Tongelen, we have a very experienced partner who has been at home in electronics manufacturing for many years. We are happy about the future collaboration and wish SMD-TEC all the best, and great success."

SMD-TEC is located in Aarschot, Belgium. The company is taking on sales of the entire Viscom product range, from SPI, AXI and AOI systems through automatic X-ray inspection, up to manual X-ray inspection and wire-bond inspection. SMD-TEC is broadly positioned and in addition to the Viscom products offers printers, board handling, pick & place systems, soldering systems, SMT material and much more.
